B.N.S. MONITOR d.o.o

NR-7401 mreÅ¾ni video snimaÅ™

Cijena po Jedinici (komad): 5 .161,25 kn; (ukljuèen PDV)

NR7401 9-CH - PoE - Gateway Supported Network Video Recorder

VIVOTEK NR7401 network video recorder provides an easy recording solution for VIVOTEK network cameras and allows users to perform real-time monitoring and recording at the same time. Supporting recording for up to 9 channels in both MPEG-4 and MJPEG formats, NR7401 provides several recording options, including alarm recording, scheduled recording, and manual recording. Installation is made easy because NR7401 can automatically detect and install VIVOTEK cameras without any configuration. Furthermore, NR7401 has four 802.3af compliant PoE (Power over Ethernet) ports that reduce cabling problems. NR7401 offers a user-friendly interface where users can configure network settings as well as control camera movement. By installing a large-volume SATA hard disk (up to 1TB) in NR7401, users can record high-definition video streams from mega-pixel cameras for a long period without worrying about running out of storage capacity. NR7401 comes with a built-in gateway that separates network cameras from regular data network so the influence of video recording on bandwidth is minimized. NR7401 also has four digital input and one digital out interfaces to allow for connection with external sensors and alarms. In addition, NR7401 offers an USB port, which can be used to connect with external storage devices for video backup.

Specifikacija:

9-channel Monitoring and Recording Simultaneously Gateway Between VIVOTEK Network Cameras and Data Network Supports VIVOTEK 6000- and 7000-series Network Cameras Built-in 802.3af Compliant PoE (Power over Ethernet) Local Video Recording with Minimal Bandwidth Impact Camera Management with Automatic Camera Installation and Configuration Video Proxy Server for Live and Recorded Video External
